REECE BARTLETT

Aspiring technology professional with a developing background in programming, data analysis, and artificial intelligence, supported by practical project experience and independent technical learning. Having completed A-levels, I am focused on building a career in technology and developing my technical and professional capabilities through hands-on projects and real-world experience. My experience at Schroders provided valuable exposure to financial technology, data analysis, and professional working environments. I bring strong analytical thinking, adaptability, problem-solving skills, and a genuine interest in learning and applying new technologies.

SKILLS

Technical:
Python, Luau/Roblox Studio, Algorithms, Data Analysis, Microsoft Office/Excel, Debugging

Analytical:
Problem-Solving, Critical Thinking, Logical Reasoning, Attention to Detail, Quick Learning

Professional:
Communication, Teamwork, Time Management, Organisation, Adaptability, Reliability

PROJECTS

Python Encryption Solution (Work Experience project):

Designed and developed a custom hash key encryption system to be implemented for the secure analysis of a data set, applied logical structure to ensure reliability and consistency of outputs, Debugged and refined code to improve efficiency and usability, Strengthened understanding of data security concepts and algorithmic thinking

Python Platformer Game (A-Level Project):

Designed and developed an interactive Python platformer style game, implemented control flow, user input handling, and modular code structure, focused on user experience and logical progression, Demonstrating strong problem-solving and iterative development

Roblox Game Development (Personal project):

Designed and developed Roblox games, working with Luau scripting, game mechanics, UI, and gameplay systems. Gained experience in problem-solving, debugging, creative design, and developing engaging player experiences from concept to implementation.

CS50x: Introduction to Computer Science (Harvard Online Course):

In progress

Studying computer science fundamentals, algorithms, data structures and problem-solving. Developing programming skills through practical problem sets and coding projects.

EDUCATION

A-Levels • SEP 2023–JUN 2025

Becket Keys Sixth Form, Brentwood

Sixth Form Prefect, supporting school events, open days, and daily school operations. Member of the Finance Group, participating in discussions on financial literacy, investment strategies, and economic topics. Achieved a Distinction in the 2025 Bebras Computational Thinking Challenge, demonstrating strong logical reasoning and computational thinking skills. A-Level grades were affected by extenuating circumstances during the examination period.

- Mathematics (D)
- Computer Science (B)
- Economics (C)

GCSE's • SEP 2021–JUN 2023

Redden Court School, Harold Wood

10 GCSEs all with an achieved grade 5 and above including grades:

- Mathematics (8)
- English Language (6)
- Combined Science (7-7)

WORK EXPERIENCE

Network London • JUL 2026

- Shadowed employees to gain insight into professional creative and publishing workflows.
- Explored how Adobe Photoshop and AI tools are used to create and enhance digital content.
- Observed the production and publication of magazines and advertisements, gaining an understanding of the creative process from design to final output.

Schroders • AUG 2024

- Developed a Python-based encryption solution within a financial technology environment
- Gained exposure to real-world applications of cybersecurity and data protection
- Participated in team discussions, developing understanding of collaborative workflows
- Built awareness of how technical solutions support business objectives
- Presented findings to professionals, strengthening communication skills

Haart Estate agents • JUL 2022

- Assisted in the creation of marketing materials for property listings
- Supported property photography and presentation processes
- Developed strong attention to detail and visual awareness
- Adapted to a fast-paced, client-facing environment
